Re: Docket No. 12-91, Solicitation of Comments Regarding Amateur Radio Communications

To Whom It May Concern:

Pictured below is a 33 foot fiberglass vertical antenna. It is very light weight and can be installed/removed in 5 minutes. It performs well on the 40 through 10 meter HF bands. The picture was taken 130 feet from the antenna. Maybe this is a “reasonable” antenna installation. If the desert had large trees like back east, I would have installed a dipole. Respectfully, Jim Tedeschi
